

Quick Reference Guide – Pathology Results

Viewing Pathology Results

Pathology results from **North Bristol Trust, University Hospitals Bristol and Weston NHS Foundation Trust** can be viewed under the Laboratory Results accessed from the Document Tree.

To view the pathology results search screen click on **Laboratory Results** (yellow document icon as shown below)

Results in Connecting Care are associated with the following Diagnostic Service:

- Blood Sciences
- Blood Transfusion
- Cellular pathology
- Infection Sciences
- Newborn Screening
- Tissue Typing

Pathology Results search

Laboratory Results Select a favourite search

The default timeframe for results is the past 3 Months, this can be amended under User Settings or the date range changed below.

Collection Date: 05-Mar-2020 to

Diagnostic Service: Blood Sciences, Blood Transfusion, Cellular Pathology, Infection Sciences

Report: full blood count

Abnormal: Yes No All

Search [Reset](#)

Collection Date	Lab Number	Requested By (Location)	Reports	Status	Diagnostic Service	Organisation	Links
12-May-2020 13:11			FULL BLOOD COUNT , D-DIMER , CLOTTING SCREEN , CALCIUM GROUP , C-REACTIVE PROTEIN , LIVER FUNCTION TEST , MAGNESIUM , UREA,CREAT - ELECTROLYTES , TROPONIN T	Final	Blood Sciences	NBT (North Bristol Trust)	

Results 1-1

- Laboratory results are **grouped by Lab number**.
- Laboratory Results will display the report with the latest collection date is at the top
- When there are no results to show given the search criteria provided (or when a patient has no results at all) the search results will show **'No Results Found'**.
- Results for UHBW will be displayed as **UHBW- Bristol** and **UHBW- Weston** as the organisation

Search criteria

Collection date

The Laboratory Results search is defaulted to show any results from the last 3 months. See Amending default settings for Pathology Results search to amend default setting.

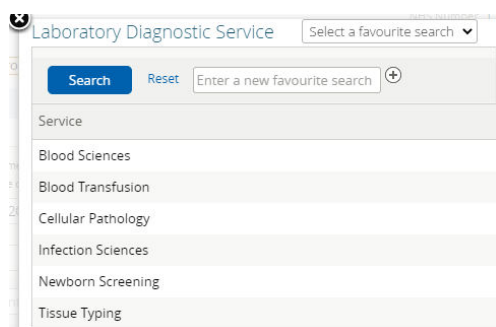

To search for a specific date or date range click on the calendar icon and select the date.

Diagnostic service

To search for a specific diagnostic service click on plus symbol next to Add

A drop down list of diagnostics services will be displayed.

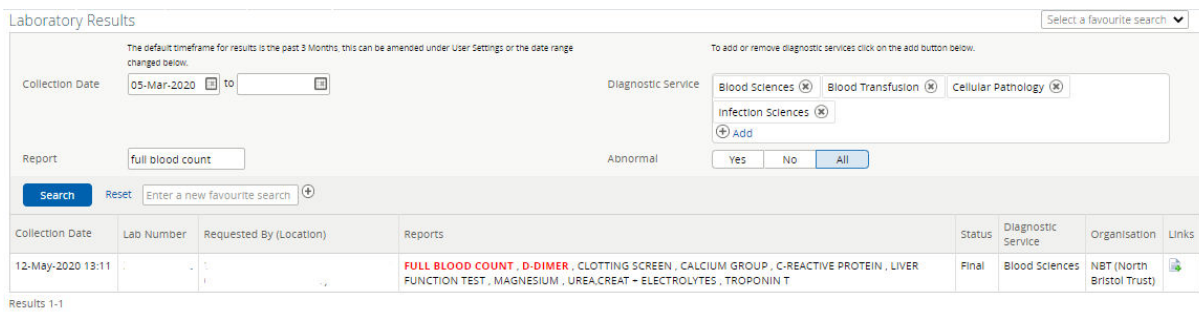

When a service is selected from the drop down list this is added to the search criteria.

To remove a diagnostic service from the search criteria click on the cross then to the diagnostic service you wish to remove.

Report

To search for a specific report add the name of the report into the textbox and click search

Abnormal

To search for an abnormal result click on **Yes** and then click search. Abnormal results will show as red.

Selecting the **Reset** link and search will reset any filters which have been selected for the search.

Saving Search Filters

If you want to reuse the filters from a search criteria for other patient records type a name into the text box 'Enter a new favourite search'

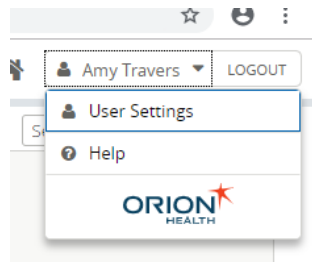

Click on the plus symbol to save the search details.

Saved searches will be shown in the 'Select a favourite search' drop down list, selecting a saved search from the list will populate the form with the details and perform the search

Amending default settings for Pathology Results search

To amend the default settings for the search click on your user profile and click on **User settings**

Underneath the Results View section of **My Details** amend the collection date by selecting from drop down list. Click **Update Preferences**.

Note: You will need to log out for the settings to take effect.

Accessing and Viewing the Reports

To access the report either click on the icon in the **Links** section or click on the report name under the **Reports** column from the Pathology search results

Single View

Displayed when Reports has a single report - select to view the single report

Grouped View

Displayed when Reports has multiple report - select to view the grouped report

Cumulative View

Displayed when Reports has a single report - select to view the cumulative view of the report

- Hover the mouse over the icon in the **Links** section to display the type of report

- Where 'Reports' contains multiple reports you can view the individual reports by moving the cursor over the report name in the 'Reports' column and selecting it.
- There are three common statuses for pathology results. The letter will be displayed in the status field.

O	Order Received
A	Some Results Available
F	Final

Single and Grouped Reports

Examples of how single and grouped reports display are shown below. Reports can either be numerical or textual.

FULL BLOOD COUNT [View Cumulative Results](#)

Collected 25-Nov-2020 00:01 Laboratory Number
 Received 25-Nov-2020 16:38
 Reported 25-Nov-2020 16:40 Requested By DAVID BRIXEY - NBT CHEMICAL PATHOLO
 Organisation NBT (North Bristol Trust) Specimen Source
 Status F

Test	Result	Ref. Range (Units)	Abnormality	Status
White Cell Count	5.00	4.0 - 11.0 (10 ⁹ /L)		
RBC	4.00	3.80 - 5.30 (10 ¹² /L)		
Haemoglobin	150	120 - 150 (g/L)		
Haematocrit	0.40	0.37 - 0.45 (L/L)		
MCV	88.0	83 - 100 (fl)		
MCH	29.0	27.0 - 32.0 (pg)

(N) NOVEL CORONAVIRUS (COVID-19)

Collected 23-Nov-2020 14:03 Laboratory Number
 Received 24-Nov-2020 10:04
 Reported 24-Nov-2020 18:32 Requested By
 Organisation UHBW (Weston) Specimen Source Nose & throat swab (Virology)
 Status F

Relevant Clinical Information

SARS-CoV-2 RNA
Not Detected

Comment
No evidence of COVID-19 infection. If there is a strong clinical suspicion of COVID-19 infection it is recommended to test a further sample set.

GROUP AND SAVE, LABORATORY COMMENT:

Collected 04-Oct-2019 10:50 Lab Number
 Received 04-Oct-2019 11:07 Requested By
 Organisation NBT (North Bristol Trust) Specimen Source

>>>> REPORT: GROUP AND SAVE : Reported: 04-Oct-2019 13:29, Status: F <<<<

Blood Group
A Rh D POSITIVE

Antibody Report
No Atypical Red Cell Antibodies Detected

>>>> REPORT: LABORATORY COMMENT: : Reported: 04-Oct-2019 13:29, Status: F <<<<

Laboratory comment:
This is the first blood grouping record for this patient. Group O Red Cells will be available in an Emergency situation. However it is the policy of this Trust that a second G&S sample MUST be sent.

FULL BLOOD COUNT, HAEMOGLOBIN A1C, GLUCOSE (PLASMA)

Collected 09-Dec-2020 17:33 Laboratory Number
 Received 10-Dec-2020 12:10
 Organisation UHBW (Weston) Requested By
 Specimen Source

Relevant Clinical Information 2940 GDM risk

FULL BLOOD COUNT : Reported: 10-Dec-2020 13:39, Status: F

Test	Result	Ref. Range (Units)	Abnormality	Status
White Cell Count	7.58	4.0 - 11.0 (10 ⁹ /L)		
RBC	3.89	3.80 - 5.30 (10 ¹² /L)		
Haemoglobin	* 106	120 - 150 (g/L)	Low	
Haematocrit	* 0.334	0.37 - 0.45 (L/L)	Low	
MCV	85.9	83 - 100 (fl)		
MCH	27.2	27.0 - 32.0 (pg)		
MCHC	317	310 - 350 (g/L)		
Platelets	206	150 - 400 (10 ⁹ /L)		
RDW	12.9	11.5 - 15.5		
Neutrophils	5.69	1.5 - 8.0 (10 ⁹ /L)		
Lymphocytes	1.09	1.0 - 4.0 (10 ⁹ /L)		
Monocytes	0.72	0.2 - 1.0 (10 ⁹ /L)		
Eosinophils	0.06	0.0 - 0.5 (10 ⁹ /L)		
Basophils	0.02	0.0 - 0.2 (10 ⁹ /L)		

* = Abnormal

HAEMOGLOBIN A1C : Reported: 10-Dec-2020 14:08, Status: F

Test	Result	Ref. Range (Units)	Abnormality	Status
Haemoglobin A1c (IFCC)	34	(mmol/mol)		
HbA1c Report comment	Diagnostic thresholds: >=48 mmol/mol probable diabetic, <48 mmol/mol at high risk of diabetic. Treatment targets: 48 mmol/mol (53 mmol/mol in type 2 diabetes if on a drug associated with hypoglycaemia) but individualised treatment advised, especially if elderly, limited life expectancy or high risk from hypoglycaemia (NICE NG 17 and 28). HbA1c may give a false indication of glycaemia if glucose rapidly changing or if abnormal red cell turnover rate.			

* = Abnormal

- Abnormal results will appear with * next to the value and will display in red. The abnormality value will also be displayed as high or low.
- If relevant Clinical Information is over 300 characters this will display as a comment.
- If there is only one report in the group then you will be able to view single report first and then cumulative
- The buttons at the bottom of the report allow navigation either to:

- **View Grouped Report Version** - display the grouped report where this report is part of the group
- **Back to Search Results** - return to the Search Results screen
