

## Quick Reference Guide – ReSPECT Plus (ReSPECT and End of Life) Record (EMIS data)

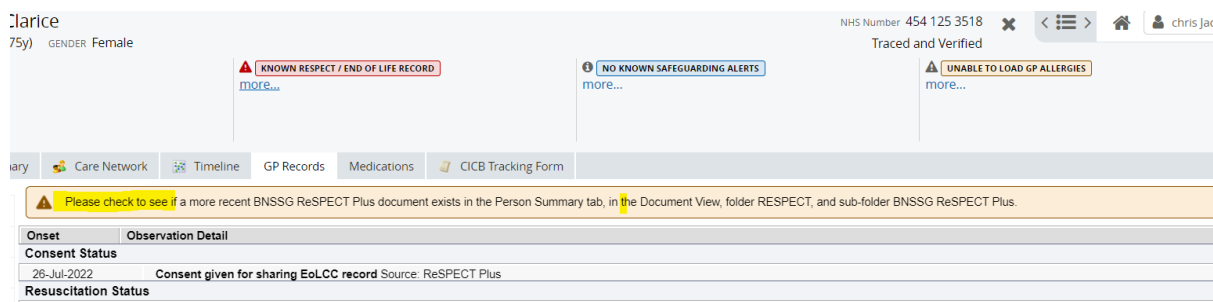

Bristol, North Somerset and South Gloucestershire (BNSSG) ICB have implemented a new End of Life/ReSPECT digital solution. This is called the Black Pear Shared Care Planning System.

From July 2023 this data can be seen in the document tab and is covered by a separate QRG which can be found here [QRG - Respect/End of Life New documents sourced from Black Pear](#). End of Life/ReSPECT data will now be added directly to the Black Pear Shared Care Planning System, and this will contain much more information than the existing EMIS views.

**We would strongly recommend that you always check for a more recent BNSSG ReSPECT Plus form in the 'Document' Tree (under the 'ReSPECT' heading) before looking at the old EMIS view detailed below.**

This guide covers only the EMIS GP data that will be retained until April 2024, code mapping has been set up to continue saving this information in the existing EMIS GP views in Connecting Care. Not all Black Pear Shared Care Planning System codes have been mapped to EMIS GP codes.

A warning message will appear in the GP EMIS views recommending that the user should check whether there is a more up-to-date Black Pear ReSPECT Plus document for the patient.

For further information about the ReSPECT Plus (ReSPECT and End of Life) Programme please contact [Healthier Together](#)

The ReSPECT/End of Life information in Connecting Care is made up of five areas:

- ReSPECT/End of Life Alert
- ReSPECT/End of Life Summary
- ReSPECT/End of Life Record
- ReSPECT/End of Life Document panel in the person summary view
- Full and summary ReSPECT/End of Life forms from Black Pear in the document view

Only the first three point are covered in this guide, the others are covered in the [QRG - Respect/End of Life New documents sourced from Black Pear](#) guide.

## ReSPECT/End of Life Alert

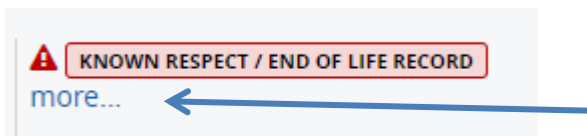

On the **patient banner** you will see the **alert for the known ReSPECT/End of Life Record**. If a ReSPECT/End of Life Record has been shared the alert will be coloured red.

There are three options for this alert:

- **‘ReSPECT/Known End of Life Record’** - this indicates the patient has a ReSPECT/End of Life Record in the EMIS GP system or the Black Pear Shared Care Planning System and will display in red.
- **‘ReSPECT/No Known End of Life Record’**- this indicates the patient **does not** have an EOL Record in EMIS GP system or Black Pear Shared Care Planning System and will display in blue.
- **‘Unable to Load ReSPECT/End of Life Record’** - this indicates the patient has not consented to sharing their information with Connecting Care or there is a problem loading the record due to a technical issue. This will display in orange.

Click on the alert and then select **‘more’**

The alert pop up will display. Click on **'Go to Full Summary'**

This will take you to the **'ReSPECT/End of Life Summary'** which is a snapshot of key ReSPECT/End of Life information. This is described in detail in the section below.

### ReSPECT/End of Life Summary

This can be accessed either by clicking on the alert and following the instructions above or by clicking on the **'GP Records'** tab and the **'ReSPECT/End of Life Summary'**. A test record is shown below to demonstrate how to access the record.

<b>Preferred Place of Care</b>	

The **ReSPECT/End of Life Summary** consists of the following sections:

- **‘Consent Status’** - this section contains consent to share the ReSPECT Plus (ReSPECT and End of Life Record) and best interest decision.

Consent Status	
26-Sep-2016	Best interest decision taken (MCA 2005) sharing EoLCC record
26-Sep-2016	Consent given for sharing EoLCC record
26-Sep-2016	Consnt appoint persn LPA persn welfar (MCA 05) shar EoLCC rec

- **‘Resuscitation Status’** - this section contains information on the patient’s resus decision and if the patient, carer and family member have been informed.

Resuscitation Status	
26-Sep-2016	For attempted cardiopulmonary resuscitation
26-Sep-2016	Not aware of DNACPR clinical decision
26-Sep-2016	Not for attempted CPR (cardiopulmonary resuscitation)
26-Sep-2016	Resuscitation discussed with patient

From February 2022 the relevant codes for resuscitation and not for resuscitation have been included:

26-Sep-2016	For attempted cardiopulmonary resuscitation
	READ code 1R00
	Time recorded 26-Sep-2016 at 14:32:46
	Person recorded Dr Emis Test
	Role of Person General Medical Practitioner

26-Sep-2016	Not for attempted CPR (cardiopulmonary resuscitation)
	READ code 1R10
	Time recorded 26-Sep-2016 at 14:32:55
	Person recorded Dr Emis Test
	Role of Person General Medical Practitioner

- **‘Main Carer’** - this section contains information on whether the patient has a carer and their contact details.

Main Carer	
26-Sep-2016	Carer - home telephone number
26-Sep-2016	Carer - mobile telephone number
26-Sep-2016	Carer - work telephone number

- **'Lasting Power of Attorney for Health and Welfare'** - this section shows information on the lasting power of attorney or has an appointed person with personal welfare lasting power of attorney with authority for life sustaining decisions.

Lasting Power of Attorney for Health and Welfare	
26-Sep-2016	Has apnt persn persnl welf LPA auth life sust decns MCA 2005
26-Sep-2016	Has appointed person with personal welfare LPA (MCA 2005)

- **'Advance Care Planning'** - this section contains information of the care plan narrative.

Advance Care Planning	
20-Aug-2019	Personal care plan completed
05-Jun-2018	Personal care plan completed
30-Jan-2018	Personal care plan completed - this is an example of a note from the community EMIS system which covers the care plan narrative

*Note: The content of this section changed April 2022 see below.*

This section will show information:

- of the current relevant important problems
- of any action points arising from the review
- what predictable problems may arise and what could be done about them
- what is to be done if the patient deteriorates
- special notes commentary (for Out of Hours)

This section will display data recorded both before and after the introduction of the Black Pear Shared Care Planning System. However, from April 2022 If clinical recommendations for **emergency care and treatment** information that has been recorded in the Black Pear Shared Care Planning System they will not be visible under advance care planning in Connecting Care.

To see clinical recommendations for **emergency care and treatment** information that has been recorded in the Black Pear Shared Care Planning System you need to exit the ReSPECT /End of Life Summary and select the **'GP view'** from the **'GP record'** in the 'Document View' and find the most recent consultation by 'Dr Black Pear Connect'. In this consultation, you should look for the focus of care in the free text, and current clinical recommendations for **emergency care and treatment** will follow immediately afterwards.

This is shown below:

GP Record (11)	20 Apr 2022	Encounter - G.P.Surgery, Courtside Surgery (General Practice)	Dr Black Pear Connect
Comment note		Information disclosure with explicit consent	
▼ Courtside Surgery (11)	20 Apr 2022	Encounter - G.P.Surgery, Courtside Surgery (General Practice)	Dr Black Pear Connect
Summary		Prescription of palliative care anticipatory medication	
Risks/Warning		Comment note    Encounter precis: Created on : 09-Apr-2022by Dr Andrew Appleton. Where : Courtside Surgery. Primary diagnosis relevant to this plan : Malignant neoplasm of female breast. Brief clinical summary : bone mets in ribs and lumbar spine, liver mets. Priorities for care and treatment : Prioritise comfort to some extent. What I most value : being at home with my family. What I most fear/wish to avoid : I dont want to go back into hospital.	
Procedure		Name of hospital or hospice : . Name of hospital or hospice : . Name of hospital or hospice : . Focus of care : Prioritise extending life. Clinical guidance :	
Problem		1. To be kept comfortable at home prioritising symptom control - does not want any life prolonging treatments. Additional clarification for clinical recommendation 1-4 : . Detail of alternative recommendation 5 : . Detail of why patient is not aware of CPR decision : . Date CPR decision made : 24-Feb-2022. CPR decision should be considered indefinite : Yes. CPR decision review date : . Location of ReSPECT Plus document : by fridge. Date of Rockwood assessment : 24-Feb-2022. Date of modified Karnofsky Performance Scale assessment : 09-Apr-2022. Additional details re prognosis : .	
Patient Detail		Wishes or priorities for personalised care care in last days of life : keep at home if possible. Other important information to help in caring for the person : . Wishes about religion : burial. Wishes re spiritual, social or cultural needs : . NHS Continuing Healthcare Fast-track pathway : .

- **‘Advance Decision to Refuse Treatment [ADRT]’** - this section shows if a patient has an ADRT or if a patient has a healthcare professional involved in discussions about ADRT.

Advance Decision to Refuse Treatment [ADRT]	
19-Sep-2016	Has ADRT (advance decision to refuse treatment) (MCA 2005)
	READ code 9NgG
	Time recorded 19-Sep-2016 at 15:01:25
	Person recorded Dr Emis Test
	Role of Person General Medical Practitioner

- **‘Preferred Place of Care’** - this section contains information on the patient’s preferred place of care. If the patient has more than one choice this should be listed in the text associated with the first choice. This will also contain any other supporting comments e.g.

Preferred Place of Care	
17-Jan-2018	Preferred place of care - home family will look after

Preferred Place of Care	
14-Dec-2017	Preferred place of care - hospice . Patient second choice is home.

It will also show any information on whether this has been discussed with the patient and/or family or if the patient is unable to express a preference.

- **‘Preferred Place of Death’** - this section contains information on the patient’s preferred place of death. If the patient has more than one choice this should be listed in the text associated with the first choice.

Preferred Place of Death	
20-Aug-2019	Preferred place of death: home

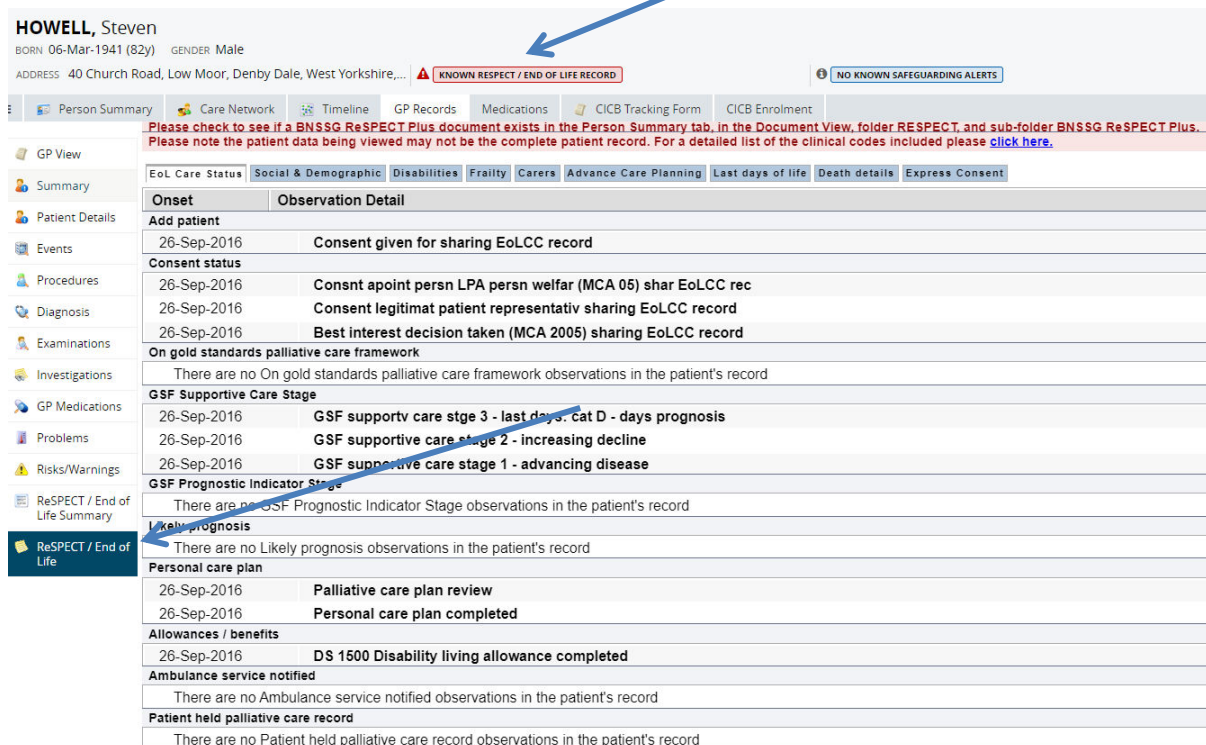

- **‘Anticipatory Medicines/Just in Case Box Issued’** - this section covers the issue and prescription of palliative care anticipatory medication and just in case medications.

Anticipatory Medicines / Just in Case Box Issued	
26-Sep-2016	Issue of palliative care anticipatory medication box
26-Sep-2016	Prescription of palliative care anticipatory medication

*Note: For each update the coded information will be in **bold**, any associated text will not be in bold.*

## ReSPECT/End of Life Record

This can be accessed either by clicking on the 'GP Records' tab and then 'ReSPECT/End of Life'.

There are no Patient held palliative care record observations in the patient's record	
<b>Supportive Care needs</b>	
There are no Supportive Care needs observations in the patient's record	
<b>Palliative care</b>	
There are no Palliative care observations in the patient's record	

The **‘EoL Care Status’** tab may show some information in the Personal Care Plan section that may have been superseded by information in the Black Pear Shared Care Planning System. To see additional information recorded in the Black Pear Shared Care Planning System that is not shared in this tab you need to exit the end of life record and select the ‘GP view’ from the ‘GP record’ in the ‘Document View’ and find the most recent consultation by ‘Dr Black Pear Connect’. In this consultation you should look for focus of care in the free text, and current clinical recommendations for emergency care and treatment will follow immediately afterwards. There is an example of how to do this on page 5 above.

- **‘Social & Demographic’** - this tab covers information for language, religion, ethnicity and organ donation.

EoL Care Status	Social & Demographic	Disabilities	Frailty	Carers	Advance Care Planning	Last days of life	Death details	Express Consent
<b>Onset</b>		<b>Observation Detail</b>						
<b>Language</b>								
31-Jan-2018	Main spoken language English							
<b>Religion</b>								
31-Jan-2018	Christian							
<b>Ethnic category</b>								
There are no Ethnic category observations in the patient's record								
<b>Sexual orientation</b>

<b>Place of death</b>								
18-Jan-2018	Patient died in hospital							
<b>Cause of death</b>								
18-Jan-2018	Cause of death : - example of cause of death							

**Note:** If a patient has been formally marked as deceased on the NHS Spine then you will not be able to view their GP or ReSPECT/End of Life Record. The last known GP practice and their contact details will display on the Care Network tab.

- **‘Express Consent’** - this tab will show if the patient has consented to share additional information with the Summary Care Record.

EoL Care Status	Social & Demographic	Disabilities	Frailty	Carers	Advance Care Planning	Last days of life	Death details	Express Consent
Onset	Observation Detail							
<b>Express Consent for Core and Additional Summary Care Record Dataset Upload</b>								
There are no Express Consent for Core and Additional Summary Care Record Dataset Upload observations in the patient's record								

**Note:** You may need to adjust the zoom on your browser to view the ReSPECT/End of Life Record.

## Other GP Views

Some of the codes recorded in the EMIS GP End of Life recording templates and the Black Pear Shared Care Planning System will also display on other GP views in Connecting Care. E.g. Diagnosis information will also display under the **‘Diagnosis’** tab on **‘GP Records’**.

Person Summary	Care Network	Timeline	GP Records
GP View	EoL Care Status	Social & Demographic	Disabilities
Summary	Onset	Observation Detail	
Patient Details	<b>Add patient</b>		
Events	31-Jan-2018	Consent given for sharing EoLCC	
Procedures	<b>Consent status</b>		
Diagnosis	There are no Consent status observations in the patient's		
Examinations	<b>On gold standards palliative care framework</b>		
Investigations	31-Jan-2018	On gold standards palliative care	
	<b>GSF Supportive Care Stage</b>		
	There are no GSF Supportive Care Stage observations in		
	<b>GSF Prognostic Indicator Stage</b>		
	There are no GSF Prognostic Indicator Stage observation		

## Viewing Updates to ReSPECT/End of Life Information

**Note:** Any updates made in Black Pear Shared Care Planning System will be shown in Connecting Care as a separate line item and will not overwrite any previous recording by the GP in their previous End of Life template in the EMIS GP System.

For example, if the patient changes their decision on the location for preferred place of death and care and this has been recorded in the Black Pear Shared Care Planning System

this will display as a separate entry for each. **The latest code will appear at the top of the list.**

Preferred place of death- location	
03-Jan-2018	Preferred place of death: home : second choice is hospice
21-Dec-2017	Preferred place of death: usual place of residence : second choice is hospital
11-Dec-2017	Preferred place of death: home : - patients second choice is hospice

## Viewing Further Information

In both ReSPECT/End of Life summary and detailed data views to view more information on a given entry **click on any of the visible entries** to drill down.

14-Feb-2022	For cardiopulmonary resuscitation .
14-Feb-2022	Not for attempted cardiopulmonary resuscitation .
15-Jan-2018	Not for attempted CPR (cardiopulmonary resuscitation)
<b>Main Carer</b>	
15-Jan-2018	Does not have a carer

Clicking on the first line gives:

Onset	Observation Detail
<b>Consent Status</b>	
24-Feb-2022	Consent given for sharing EoLCC record Source: ReSPECT Plus
	READ code 9Nu6
	Time recorded 24-Feb-2022 at 00:00:00
	Person recorded Dr Black Pear Connect
	Role of Person Secretary
11-Feb-2022	Consent given for sharing EoLCC record Source: ReSPECT Plus
10-Feb-2022	Consent given for sharing EoLCC record

From April 2022 ReSPECT PLUS (ReSPECT and End of Life) will be recorded in the Black Pear Shared Care Planning System. Agreed information from this system flows to the EMIS GP System and Connecting Care.

Full information about the care plan is contained in the Black Pear Shared Care Planning System. If you have access to the Black Pear Shared Care Planning System this will give a full history of the changes made to ReSPECT Plus (ReSPECT and End of Life) data from April 2022.

Within Connecting Care the person that recorded the data will now be shown as 'Dr Black Pear Connect'.

If you don't have access to the Black Pear Shared Care Planning System you can check the copy of the ReSPECT Plus form that is printed and given to the patient. This shows the name of the clinician making the CPR decision, the name of the senior responsible clinician and the name of the person who last updated it.
