

Reference: FOI.ICB-2324/238

Subject: Spirometry Services

*I can confirm that the ICB **does hold some of information requested**; please see responses below:*

QUESTION	RESPONSE
1. What proportion of GP practices are doing spirometry themselves for annual respiratory reviews?	94% GP practices offered spirometry service during Apr-Aug 2023. We do not split out reasons for spirometry.
2. What proportion of GP practices are doing spirometry themselves for breathless patients without a diagnosis?	The ICB does not hold this information.
3. What proportion of patients on asthma and COPD registers have spirometry documented in the last 3 years?	The ICB does not hold this information.
4. Do you use outsourced spirometry services to support primary care? a. If so, what are the names of the spirometry providers commissioned to deliver the service to your patients? b. If so, how many organisations have you contracted with in 2023/24 so far?	No, we don't outsource or contract separately for spirometry services as an ICB.

<p>c. How much was spent in total procuring these services? d. When will you be recommissioning spirometry providers?</p>
