Subject: Federated Data Platform (FDP) Implementation

I can confirm that the ICB does hold some of the information requested; please see responses below:

QUESTION	RESPONSE
This is a request for information under the Freedom of Information Act 2000 regarding the local rollout and implementation of the Federated Data Platform (FDP). Please could you provide full answers to the following two questions and supply copies of the documents requested where appropriate. In the below questions the term live, in relation to the FDP, refers to the ICB having the platform available for use, known as a local instance. If the ICB has a live local instance, but has not adopted or trialled any FDP apps, dashboards or evaluation tools, please only answer question 2.	
1. a) If the FDP is currently live at your ICB, please can you describe the process/methodology by which the trust has internally monitored the roll out of each individual app, dashboard and evaluation tool in terms of effectiveness, potential risks, patient impact/engagement, appropriate data management and cost effectiveness. Please could you specify the types of assessment tools used, and provide copies of them including, but not limited to copies of the following documents:	a) The first live FDP App for BNSSG (Bristol, North Somerset and South Gloucestershire) is the Service Coordination Centre (SCC), where go-live is planned for early August. As SCC has not yet been rolled-out, monitoring/evaluation has not yet commenced as the app has not gone live. As we have not yet rolled-out SCC, assessment tools are N/A b) Working groups: • FDP SCC Pilot BNSSG weekly meeting • National BNSSG Handover to BaU

• Data protection impact assessments. • Equality impact assessments. • Information governance committee assessments/reports. • Risk assessments. • Business case. • Board minutes discussing the Federated Data Platform. • Implementation plan. • Academic research or evaluations b) Please could you also list any working groups or committees which had oversight of, or responsibility for, the roll out and evaluation of FDP apps, dashboards and evaluation tools and what their remits were.	Remit - overall delivery and control of SCC Strategic: • FDP system delivery Forum (National) Remit – Future deployments and functionality
2. If your ICB is live (has an active local instance of the FDP), but has not deployed any Apps, dashboards or evaluation tools please can you: i. Explain why no apps, dashboards or evaluation tools have been deployed. ii. Are you currently looking at trialling or adopting any FDP apps, dashboards or evaluation tools.	i. BNSSG is currently assessing the appropriate tools, dashboards and evaluation tools, with SCC as they first instance (to replace the Care Traffic Control Centre CCTC) ii. Yes iii. SCC is currently on the pathway to “go-live” by Aug 2026 Others that are being considered in the early stages are One Optica and Strategic Commissioning Tool. There are no confirmed dates against the adoption of these.

iii. If yes to the above, please name each app, dashboard or evaluation tool you are considering and when you are looking at adopting them.

The information provided in this response is accurate as of 24 July 2026 and has been approved for release by Jo Hicks, Chief Transformation, People and Organisational Development Officer for NHS Bristol, North Somerset and South Gloucestershire ICB.
