ICB: BNSSG ICB

Date: Sep-26

All questions relate to **adults aged 18–64** funded by the ICB in **long-term residential care, nursing care or supported living**, including placements jointly funded with the local authority.

By '**mental health**' we mean adults whose primary support reason or primary diagnosis is a mental health condition – for example schizophrenia and other psychotic disorders, bipolar affective disorder, severe depression, severe anxiety disorders, personality disorder and eating disorders. Please count each person once, on a primary basis only, and exclude adults whose primary reason for support is learning disability, autism or dementia, even where a mental health condition is also recorded. Please answer on primary diagnosis where you hold it; if you use care groups, this is your 'Mental Health' group.

Settings: by 'residential care' we mean a care home without nursing; by 'nursing care' we mean a care home with nursing. Supported living may also be called Supported accommodation or Supported housing and is a housing scheme where housing, support and care services are provided to help people with disabilities live as independently as possible in the community. Please include only supported living where the provider is registered with the CQC to deliver personal care

Which placements to include: Continuing Healthcare (fully funded), joint-funded, Funded Nursing Care where the ICB holds it, and Section 117 aftercare.
